MEETING THE SPECIAL NEEDS OF CHILDREN

July 3, 2017

Dear Windsor Prep Community:

Our school is committed to protecting student, teacher, and staff health. To protect our community and be in compliance with the Department of Education regulations, Omega Environmental Services conducted a follow up test for lead after a lead filter kit was installed on one water fountain with a first draw result above the action level and a flush result below the action level. The results of the re-test revealed a first draw result of 4.43 $\mu\text{g/l}$ (ppb) which is significantly below the action level. This indicates that the filter successfully addressed the elevated lead level. The location has been put back in service and a filter maintenance plan put in place.

For More Information

A copy of the test results is available in our central office for inspection by the public, including students, teachers, other school personnel, and parents, and can be viewed between the hours of 8:30 a.m. and 4:00 p.m. and are also available on our website at www.windsorprephs.com For more information about water quality in our schools, contact Annmarie Scorzo, Business Manager at 973-247-1375.

For more information on reducing lead exposure around your home and the health effects of lead, visit EPA's Web site at www.epa.gov/lead, call the National Lead Information Center at 800-424-LEAD, or contact your health care provider.

If you are concerned about lead exposure at this facility or in your home, you may want to ask your health care providers about testing children to determine levels of lead in their blood.

Sincerely,

Robert Scorzo
Director
